CHECK WEIGHER

The Agmechtronix Check Weigher is designed to check the weight of bags of various produce such as onions, potatoes and citrus. If the weight measured is above or below user programmable limits, the check weigher rejects the bag from the conveyor.

PRODUCT FEATURES

- Highly versatile weigh-in motion system
- Economically priced
- Capable of check weighing 40 bags per minute
- Compact design allows for mounting near ground to fit into existing pack equipment
- Easy to use interface
- Please inquire about different sized machines

HAY BALE WEIGHER

The Agmechtronix Hay Bale Weigher weighs 2 or 3 string bales of hay as they exit the quarter turn chute of a baler. The weights are displayed in the cab of the tractor. The Hay Bale Weigher also tracks every 10 bale averages and bale weight averages for the entire day.

PRODUCT FEATURES

- Accurate weights for up to 15 bales per minute
- Meet specs without giving away product
- Weight of each bale along with last 10 average and daily average shown in the cab
- Doesn't hang lower than a standard 1/4 turn chute to prevent dragging
- Includes a complete 1/4 turn chute with the scale built in
