PRODUCT DESCRIPTION

The Agmechtronix Planter Monitor ensures that tractor drivers aren't forgetting to engage the hydraulic planter drive during a pass. The device has a blinking green light mounted on the planter that flashes each time the drive shaft rotates. If the planter shaft stops rotating, a blinking red light is displayed. As an option, the lights can be displayed on a cab-mounted box as well.

- ✓ Quickly Alerts Operator Of Problems
- ✓ Helps Train Inexperienced Tractor Operators
- ✓ Improves Driver Efficiency

PRODUCT FEATURES

- 💡 Visually indicates to the driver that the hydraulics are engaged and the planter shaft is turning by flashing a green light during each rotation.
- 💡 Visually indicates that the planter shaft has stopped rotating by flashing a red light
- 💡 Lights are visible inside the cab as well as on the implement itself

Eliminate Financial Loss From Unplanted Fields!!
